Mission and Vision

OUR MISSION

The School capitalizes on its engineering science tradition, a low student to faculty ratio, and a rich liberal arts environment to give future professionals deep technical abilities, the capacity to adapt to the rapid changes in engineering, and the interdisciplinary background and aptitude for innovation that sets them apart from graduates of other engineering schools.

OUR VISION

The School will positively transform lives and communities through innovative engineering education and discovery.

OUR GOALS

The School aims to:

- Ensure an environment conducive to learning, teaching and research. This includes a diverse and multicultural first-rate faculty, staff and students, and state-of-the-art facilities.
- Provide a top-quality ABET accredited undergraduate program suitable for the 21st century.
- Foster a vibrant graduate program and perform quality research in line with national trends and achieve national recognition in selected areas.
- Establish strong partnerships and lasting relationships with industry, government, professional societies, alumni and academia.
- Make significant contribution to the technological and economic development of the State of Mississippi and the region through education, research and service.
- Increase the visibility of the School of Engineering locally and nationally.

Diversity

The innovation and creativity fostered through diverse teams representing different backgrounds, perspectives and life experiences are needed to address engineering challenges of the 21st century and to advance our state.

We at the School of Engineering are committed to promoting a culture of diversity, equity and inclusion throughout our constituencies.

Our chapters of the National Society of Black Engineers and Society for Women Engineers help promote academic and professional success. This includes activities such as community outreach and alumni sharing their experience.

Thanks to supportive alumni, we offer scholarships for students who demonstrate a commitment to the advancement of women and minorities in engineering and computer science.

We are putting in place a targeted equity-in-action plan to create diverse workforce pipelines toward engineering careers. For our students, that includes activities such as:

- Tutoring and mentoring programs for success in and out of the classroom.
- Hands-on experience with internships and research opportunities.
- Greater alignment with the university's Improving Minority Access to Graduate Education (IMAGE) program.
- Networking opportunities, information sessions and technical talks with industry partners to encourage a diverse workforce.

Find out more at engineering.olemiss.edu/diversity

Academic Integrity

Integrity and honesty are essential for success in your studies and career. It's a question of respecting your peers, professors and others by following established ethical values.

The School of Engineering honor system seeks to instill in each student the highest standard of personal integrity and professional responsibility.

Unacceptable behavior includes:

- Plagiarism.
- Using someone's work.
- Knowingly allowing someone else to represent your work as his/her own.
- Gaining or attempting to gain an unfair advantage.
- Disruptive behavior.
- Harm to the facilities that support the academic environment.

HONOR PLEDGE

Our students are asked to adhere to the university's honor pledge:

"I pledge myself to uphold the highest standard of honesty in my university life and I will not tolerate dishonesty on the part of others."

ACADEMIC MISCONDUCT

First instance of misconduct

The relevant professor will apply a sanction such as a repeat assignment, fail or reduced grade.

Second instance of misconduct

The Dean or other school representative will meet with the student to discuss the seriousness of academic misconduct and attempt to identify the cause. They can decide to place an increased sanction such as disciplinary probation, suspension, expulsion, non-renewal of scholarships, non-eligibility for awards or course failure.

Advising

You'll have academic advisory support every step of the way – from your freshman year to graduation.

As part of orientation, we'll give you help in registering for your first classes at Ole Miss. Throughout the rest of your freshman year, the Center for Student Success and First Year Experience will provide academic advising.

Each semester, you will meet with an advisor to help schedule your courses.

To prepare for this meeting, you should review your Degree Audit in myOleMiss so you'll have an idea what courses you need to take.

Tutoring

Engineering requires work, ingenuity, passion and persistence. Ole Miss wants you to succeed: our tutors help you better understand core engineering topics.

Tutoring is available for a variety of STEM subjects. Engineering teaching assistants and honor students lead these help sessions at no charge.

Find out more at engineering.olemiss.edu/tutor

Course Requirements

MAJOR-DEFINED REQUIREMENTS

Each major has its own course plan, often to be taken in a set order. Find out the requirements for your major in your Degree Audit in myOleMiss or at catalog.olemiss.edu.

ACCEPTABLE COURSE CREDIT

The School of Engineering recognizes credit earned by:

- advanced placement classes
- dual enrollment
- International Baccalaureate

See the UM catalog for [information about credit by exam](#).

TRANSFER CREDIT FROM OTHER INSTITUTIONS

You must get [advanced approval](#) from your department to receive credit for any courses taken at another institution. See registrar.olemiss.edu/transfer-equivalencies/ to find out whether a course is transferable.

HONORS COLLEGE

Honors 101 and 102 can satisfy the First-Year Writing requirement. Or, the credits can be used as 3 hours of humanities and 3 hours of social science.

MINOR

You may pursue a minor in a department different from your major.

A minor typically consists of 18 hours, with the required courses outlined in the university undergraduate catalog. No more than 8 credit hours cited specifically by course number and title as a requirement for an engineering degree may be used toward fulfillment of the minor requirements.

A minor field may be in any discipline that offers a minor at Ole Miss, except for:

- chemistry for chemical or biomedical engineering students.
- geology for geological engineering students.
- computer science for computer engineering students.

SOCIAL SCIENCES, HUMANITIES & FINE ARTS

The School of Engineering requires 18 hours of SS/H/FA courses.

Hours required

- 6 credit hours in social sciences.
- 3 credit hours in humanities.
- 3 credit hours in fine arts.
- Plus: 3 credit hours in humanities, fine arts or modern/ancient language.
- Plus: 3 additional credit hours in social/behavioral science, humanities, fine arts, language or general education as defined by individual departments.

Acceptable courses

Use our [advising guidance for social science, humanities and fine arts courses](#) to make sure you meet your requirements.

Social sciences

Anthropology, Economics, Political Science, Psychology and Sociology courses.

Humanities

African American Studies, Classics, English Literature, Gender Studies, History, Philosophy, Religion and Southern Studies courses.

Fine Arts

Lecture-based courses taken in the history, appreciation and theory of art, dance, music and theatre arts. Studio type courses such as band, acting, dance, drawing, etc. are not applicable for an engineering degree.

Languages

Modern languages, Ancient languages and American Sign Language.

General education

Select courses in military leadership, chancellor's leadership, business & speech.

Major-specific requirements can be found in your Degree Audit in myOleMiss or at catalog.olemiss.edu.

GRADE POINT AVERAGE REQUIREMENTS

To graduate, the School requires, as a minimum, a 2.00 grade point average:

- for all courses taken at Ole Miss.
- for all college work attempted at all institutions.
- for School of Engineering course work.

The GPA is total quality points divided by hours attempted. Total quality points are calculated by multiplying credit hours by points earned for each class.

Student Organizations

You can join our engineering groups to deepen your connections within the school and to help local communities.

ENGINEERING STUDENT BODY

The Engineering Student Body (@olemissesb) oversees mentoring and tutoring programs, assists in the running of school-wide events and participates in community service projects.

Contact: esb@go.olemiss.edu

Advisor: Megan Miller, megan2@olemiss.edu

NATIONAL SOCIETY OF BLACK ENGINEERS

National Society of Black Engineers (@olemissnsbe) promotes the academic and professional success of African-American engineers and engineering students.

Advisors: Tim Holston, ttholsto@olemiss.edu

Damian Stoddard, dlstodda@olemiss.edu

SOCIETY OF WOMEN ENGINEERS

The Society of Women Engineers (@sweolemiss) empowers women in engineering as exceptional leaders and professionals.

Advisor: Joanna Harrelson, jdh@olemiss.edu

SOCIETY OF AMERICAN MILITARY ENGINEERS

The Society of American Military Engineers (@sameolemiss) works to develop multi-disciplined solutions – engineering, cyber security, project planning and more – to national security challenges.

Advisor: Ned Mitchell, kenneth.n.mitchell@usace.mil

SOCIETY OF HISPANIC PROFESSIONAL ENGINEERS

The Society of Hispanic Professional Engineers (@shpeolemiss) is dedicated to fostering Hispanic leadership in STEM fields.

Advisor: Alex Lopez, amlopez2@olemiss.edu

Student Organizations

TAU BETA PI

The Tau Beta Pi honor society brings together high academic achievers in their junior and senior years to participate in tutoring projects and foster professionalism among students.

Advisor: Elliot Hutchcraft, eweh@olemiss.edu

UM ROCKET TEAM

The University of Mississippi Rocket Team (@umrocketteam) gives students hands-on experience in the rocket build, test and launch activities used by NASA and space industry engineers.

Advisor: Darin Van Pelt, dvp@olemiss.edu

Academic Organizations

You can enhance your personal and professional skills by joining your discipline's society. This gives you access to students, alumni, training and competitions beyond your studies.

Co-ops

Cooperative education, or co-op, provides you with the unique opportunity of working in a professional capacity for several months during your time as an undergraduate student.

Our students have recently been on co-op placements at Dupont, International Paper, Medtronic, Tesla, Toyota, Viking Range and more.

With a co-op, you will take a semester (or more) off from classes and typically work full time for at least 16 weeks. This will be equivalent to a full academic load. The enrolled co-op student is considered full-time for insurance purposes and the deferment of loan repayment.

You are well compensated for your work and you gain relevant engineering experience to add to your resume.

Check out engineering.olemiss.edu/co-op

Career Support

Ole Miss Engineering will help you connect with the 100-plus employers who look to Ole Miss to employ engineering and computer science students for their full-time positions, co-ops and internships. That could be through our bi-annual career fairs, company info sessions and hands-on events.

To prepare for a job, you can take advantage of our wide range of workshops. They cover everything from resume writing to interview skills to networking strategies. And, with our senior course on leadership skills, you'll get guidance from business, academic and military professionals on how to deal with real-world work situations.

Contact information - for co-ops and careers

Megan Miller

Assistant Dean, Student Programs

megan2@olemiss.edu

Our students on their teachers:

I look at the amazing things that she has done and her love for her work and it spurs me to push forward | **Inspirational leader and teacher** | He is super smart and does his best to break down concepts for us | Her pushing helped all of us to grow more than we ever would have thought possible | He knows how to **connect with the students** | He makes time for students count - extremely intelligent | He is very helpful when you are stuck on a problem and will walk you through the subject in an easy to understand way | He finds a way to make the most seemingly complex ideas understandable | She is **great to talk to** as a fellow woman in STEM | He gives me some **lifelong advice** to help me improve not only my grades but also the ability to become a good engineer | I have never met a professor that is as **passionate** about his areas of expertise | His research is amazing and is inclusive of students from the freshman level to graduate | He gets the best out of his students and really cares for them | She is very helpful when trying to understand a subject | **Awesome!**
